COMPANIES

AN INTRODUCTION

M/s. Autonum Controls Pvt.Ltd. (ACPL)

An ISO 9001:2008. company as one of the most skilled organization in Automation project execution. We have almost 21 years of experience in Maintenance, Servicing and repairs of CNC, PLC, AC-DC Drives & Process Control Instruments.

Since last 21 years we have served our customers to the best of our ability which in turn has gained their trust and enabled us to build a successful long-term relationship. We value quality service and are fully committed to satisfy your industrial needs.

For Quality work we have E.S.D safe workshop with In-circuit functional Testers, soldering / de-soldering & hot air stations to repair multi-layer & SMD cards to component level.

M/s Autonum Technologies & Systems Pvt. Ltd. (ATSPL)

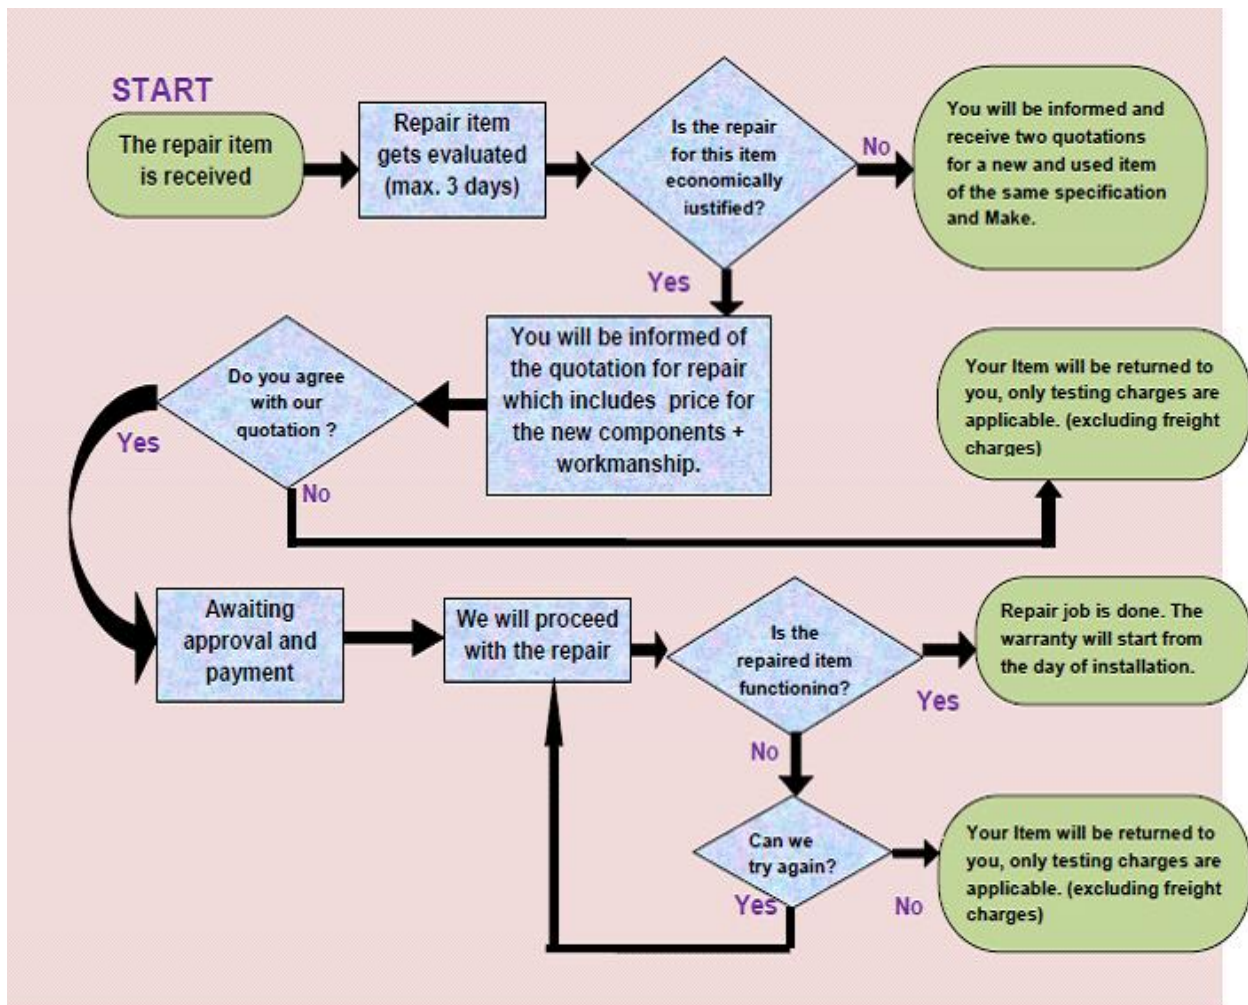

A fast growing Industrial Automation company providing spares of electronic automation systems for spectrum of Industries

We also supply & install the old Generation Automations Spares with One-year warranty. We have very large stock of **Siemens system cards mainly S-5, S-7 PLC & Drives.**

Repair Process:

- After receiving your item, we will do a free evaluation of the device and inform you of the repair cost
- In case the device is badly damaged and uneconomical to repair, we will quote you for a used or new device of the same brand and specifications
- After the evaluation period, if it is economical to repair the item, we will only proceed to upon receiving your approval (PO) of our quote
- We consider a repair job to be finished only if the item is meeting your expectations and is fully functional, Autonom will not charge the customers if the repaired item would 'not' work up to a satisfactory level when installed

Please refer the following image for a visual representation of the entire process,

Why Autonom?

- We provide Warranty up to 1 year for repairing & replacement
- In case, the part becomes faulty and is beyond repair, the entire cost of replacement is borne by us
- We provide savings up to 70% if it is feasible to buy new item instead of getting it repaired (BUYBACK)
- On-site repair is available
- On-site testing is available

Devices:

We supply & Repair the following types of Devices,

- AC/DC Drives
- Servo Motors/Drives
- CNC Boards
- CPU's & Processors
- Counters
- Flow Meters
- Frequency Converters
- I/O Modules, Cards
- Inverters
- Monitors & Flat Panels
- Power Supplies
- Pressure Transmitters
- Pressure Transmitters
- Electronics
- Process Control Systems
- Programmable Logic Controller (PLC)
- Industrial Scales
- Soft Starters
- Temperature Controls
- UPS Systems
- Variable Frequency Drive
- Video Display

...& many more.

Brands:

We supply & repair machines & parts of the following makes,
